EXAMINER'S AMENDMENT

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a method for reclamation of precious metals plated onto circuit board runners and contacts, classified in class 29, subclass 403.1.
 - II. Claims 6 and 7, drawn to an installation for the reclamation of precious metals plated onto circuit board runners and contacts, classified in class 29, subclass 762.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another and materially different apparatus which does not require a flattening device.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Frank Lachenmaier on October 4, 2005, a provisional election was made without traverse to prosecute the invention of Group I, claims 1-5. Affirmation of this election must be made by applicant in replying to this

Office action. Claims 6 and 7 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Frank Lachenmaier on October 5, 2005.

The application has been amended as follows:

In the title,

"Method and Apparatus for Reclamation of Precious Metals from Circuit Board Scrap" has been changed to - -Method for Reclamation of Precious Metals from Circuit Board Scrap- -.

In the claims,

Claim 1, *Line 10*, "rms" has been deleted;
 Line 16, "the" in its first occurrence has been deleted.

Claim 5, *Line 2*, "a" has been deleted.

Non-elected **claims 6 and 7** have been canceled.

6. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Reference numeral 44 will be added to the drawings. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

7. The following is an examiner's statement of reasons for allowance: Regarding **claim 1**, the prior art does not teach or suggest introducing an electromagnetic field to the beaker at specific frequencies within the range of 7 kilohertz to 1 megahertz and power levels within the range of 0 to 400 watts and continuing the application of the field until the solution will not absorb more unwanted metals, turning the field off, pouring the loaded solution from the beaker through a screen to a precipitation tank, refilling the beaker with remaining screened metal and fresh solution, reapplying the field and repeating step (c) two to five times until there are no more unwanted metals to shear from the precious metals and be absorbed by the solution, in combination with the other claimed limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jermie Cozart whose telephone number is 571-272-4528. The examiner can normally be reached on Monday-Thursday, 7:30 am - 6:00 pm.

9. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Bryant can be reached on 571-272-4526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
